**EXAMINER'S AMENDMENT**

1. Authorization for this examiner's amendment was given in a telephone interview with Mr. Max Moskowitz (reg. # 30,576) on 2/22/2011.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Please cancel claims 5-9.

**REASONS FOR ALLOWANCE**

4. The following is an examiner's statement of reasons for allowance:

A review of Applicant's arguments in the Papers filed 2/28/2011 and 11/4/2010 and a review of the instant claims, which encompass the examiner's amendments as discussed with and accepted by Applicant's attorney, Mr. Max Moskowitz (reg. # 30,576) in a phone interview on 2/22/2011 has convinced the examiner that the claims are allowable over the applied prior art of record.
5. The terminal disclaimer filed 2/28/2011 regarding co-pending applications 11/817,285 and 11/570,016 are noted. All double patenting rejections have been withdrawn.
6. Regarding independent claim 10 and the dependent claims, the prior art fails to teach or suggest a microwavable vacuum-packed frozen sushi product comprising: a vacuumed and hermetically sealed flexible microwave-safe plastic packing bag which is vacuumed to pressure of 600 mm Hg or lower; an open-topped plastic box having a

top opening and a bottom, the top opening of which is formed as to be broader than the bottom, placed in said packing bag; in the packing bag, a space being formed around the sushi product in the vacuumed condition, which provides interspaces between the sushi product and the plastic box and between the plastic box and the packing bag; and a frozen sushi product which is formed by at least one shaped form of frozen boiled rice and a sushi material placed on a surface of each form of said at least one shaped form of frozen boiled rice, placed in said box; an inner surface of plastic packing bag being in contact with surface of the sushi material or the boiled rice of said sushi product, and an inner surface of plastic box being in contact with the surface of the sushi material and the boiled rice which is different from said contacting surface, a space being formed in said plastic packing bag around said sushi product, said packing bag, said box and said sushi product being frozen together in a unified form, the space formed around the sushi product in said packing bag having a volume 0.2 to 0.6 times that of sushi product at the time of thawing by means of microwave, and after thawing, a resulting packed sushi product being able to stand for a period of 15 to 30 minutes without unpacking, allowing water vapor emanating at least from the shaped rice section to flow in a space formed between the sushi product and the box, thereby steaming the shaped rice section and the sushi material or materials between 15°C and 30°C.

7. The closest prior art of Ishino et al. (JP 2001275591) teaches a packaged frozen sushi that can be defrosted in a microwave oven, however, fails to teach a plastic packaging bag which is vacuumed to 600 mm Hg or lower, an open-topped plastic box wherein the box is an open-topped plastic box having a top opening and a bottom, the

top opening of which is formed as to be broader than the bottom, placed in said packing bag with the space formed around the sushi product in said packing bag having a volume 0.2 to 0.6 times that of said sushi product at the time of thawing, by means of microwave, and after thawing, the resulting packed sushi product being configured to stand for a period of 15 to 45 minutes without unpacking, allowing water vapor emanating at least from the shaped rice section to flow in a space formed between the sushi product and the box, thereby steaming the shaped rice section and the sushi material or materials between 10°C and 30°C. As articulated by Applicant at pages 7-8 of Applicant's paper filed 11/4/2010, adding the additional structures as disclosed by Guarino and Reutimann would make Ishino's product more expensive without any obvious benefit. The spacing and relative shapes of the box and bag as set forth in the claims is critical for the sushi to thaw and function as intended. The prior art does not appreciate the benefits of these features.

8. The secondary references of record do not teach or suggest the combined limitations not taught by Ishino.
9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
